

# WE HAVE THE RIGHT TO KNOW WHAT'S IN OUR FOOD.

THIS FALL  
**VOTE YES** TO LABEL  
GENETICALLY ENGINEERED FOOD

Yes on I-522 is the campaign to ensure genetically engineered foods are labeled in the state of Washington. This initiative would require labels on any genetically engineered foods, which can include sweet corn, corn chips, cold cereals, candy and soft drinks — and, if approved, salmon and apples.

More than 340,000 Washingtonians — families, farmers, small business owners, consumer rights organizations and many others — signed petitions to get I-522 on the 2013 ballot so voters can decide.

Paid for by Yes on I-522 Committee, 603 Stewart Street #819, Seattle, WA 98101

# WHY LABEL GENETICALLY ENGINEERED FOODS?

-  We have the right to know what's in the food we eat and feed our families.
-  American companies already label genetically engineered food they export to 64 other countries. They should do the same here.
-  Supported by moms and dads, fishing families, farmers, business owners, consumers and many more.
